

RAKSHA B R

Software Engineer – C++ – Python – Linux – File Storage Systems – AI-Assisted Development – Debugging
+91 8105646245 | rakshabrr@gmail.com | Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Software Engineer II with experience in backend development and distributed systems, primarily using C++, Python, and Linux. Experienced in end-to-end product development, debugging, root cause analysis, and production issue resolution. Strong foundation in scalable systems, automated testing, and AI-assisted development, with hands-on exposure to MCP and Spec-Driven Development.

TECHNICAL SKILLS

Languages: C, C++, Python, Go, Java

Backend & APIs: Backend Development, REST APIs, Microservices, API Design, API Integration, Concurrency, Networking, Database Fundamentals

Systems: Computer Architecture, Operating Systems, Computer Networks, Distributed Systems, File Systems

Engineering: Data Structures & Algorithms, Object-Oriented Programming, Debugging, Root Cause Analysis, Unit Testing, Functional Testing, Regression Testing, E2E Testing

Cloud & AI: AWS, Cloud Fundamentals, RAG, MCP, LLM Integration

DevOps & Tools: Docker, CI/CD Pipelines, Jenkins, Git, Linux

EXPERIENCE

Software Engineer II

Sep. 2025 – Aug. 2026

Dell Technologies

Bengaluru, Karnataka, India

- Developed core backend functionality in C++ and Python for Dell PowerScale OneFS SmartSync, contributing to distributed data mobility and replication workflows across enterprise storage environments.
- Implemented and enhanced Failover/Failback (FOFB) functionality in SmartSync, working with SnapRevert to support data mobility and recovery workflows.
- Investigated complex production issues through root-cause analysis, code-path tracing, log analysis, reproduction, and debugging, resolving defects across distributed storage workflows.
- Designed and implemented unit, functional, regression, and end-to-end tests for backend features, validating failure scenarios and reducing regressions across SmartSync releases.
- Enhanced OneFS CLI functionality with input validation and confirmation handling, improving robustness and supporting associated test coverage.
- Harnessed AI-assisted engineering with MCP and Claude, integrating LLM-powered workflows into development, debugging, testing, and validation pipelines to accelerate feature delivery and engineering workflows.

Graduate Intern

Nov. 2024 – Aug. 2025

Dell Technologies

Bengaluru, Karnataka, India

- Developed Python automation for CVE identification and remediation across Dell ECS/ObjectScale storage environments, reducing repetitive manual investigation and remediation work.
- Built automated storage-system validation workflows covering parameter history, directory table dumps, blacklisted nodes, and system bucket configurations.
- Developed reusable storage-platform verification utilities for health and configuration validation, improving consistency across recurring engineering workflows.
- Investigated storage validation failures and collaborated with senior engineers to improve automation frameworks, diagnostics, and verification workflows.

EDUCATION

RV College of Engineering

Bengaluru, Karnataka, India

Master of Technology in Computer Science and Engineering

Feb. 2024 – Aug. 2025

JSS Science and Technology University

Mysuru, Karnataka, India

Bachelor of Engineering in Computer Science and Engineering

Aug. 2019 – Aug. 2023
